Re: Reference

Fort Worthington EMS has had the pleasure of working with CGK as an in-kind partnership program during the 2021-2022 school year. CGK has provided 150 of our students in grades 3-8 access to supplemental STEM education through their coding program. Participants learned a series of coding languages ranging from beginner levels to advanced and were able to effectively demonstrate understanding at the end of program term.

Sincerely,

Nia Berry
